

WOODSIDE PARK FIREWISE ACTION PLAN 2013-2014

1. Research the feasibility of placing “Fire Danger Level” signs at the two Woodside community entrances. The Firewise Committee believes that this will promote fire level awareness and further encourage residents to become proactive regarding fire mitigation efforts.
2. Work with Elk Creek Fire Protection District, state agencies and/or property owners to establish an alternative emergency evacuation route from Woodside. The committee realizes that this may be a difficult task and may take several years to execute but we believe it is an important issue to be addressed.
3. Obtain a “power line rating” by the local electric company, Intermountain Rural Electric Association, to help identify areas where trees may need to be removed.
